Tour IV: Activity #29 - Terrorism Management
Directions: Take some time to reflect on what you have learned; use additional paper as needed to complete the activities.
Select a specific biological agent that could be introduced into the community water supply. Use the information on the www.state.ny.us/security and www.health.state.ny.us websites to assist in completing this activity.
 Identify the primary, secondary and tertiary prevention measures that would be effective in eradicating the biological agent.
 Prepare a personal/family survival kit based on public health checklists; www.ready.gov is a
good resource for this activity.
