

**Are You Safe at Work?**  
**Respiratory Protection for Nurses: Model Program Information**

**Program Evaluation Checklist**

Check that at your facility:

- Workplace evaluations are being conducted as necessary to ensure that the written respiratory protection program is being effectively implemented.
  
- Employees required to wear respirators are being regularly consulted to assess the employees' views & to identify problems with respirator fit, selection, use & maintenance.
  
- Any problems identified during assessments are corrected.
